

**SUMMARY**

Final-year Business Analytics student with hands-on experience in Excel, Power BI, Tableau, SQL, and Python. Skilled in data cleaning, analysis, and visualization through projects like customer churn analysis and KPI reporting. Completed internships and simulations involving financial data validation, workflow improvement, and dashboard creation. Strong analytical mindset, detail-oriented, and eager to contribute to EY's Data Operations team.

**EDUCATION**

Name of course	Year	Name of institute	Marks/CGPA
Bachelors of Business Administration	2023-2026	Christ University, Bengaluru	<b>3.60 / 4.00</b>
Class XII, CBSE	2023	Delhi Public School, Numaligarh	<b>88%</b>
Class X, CBSE	2021	Delhi Public School, Numaligarh	<b>89%</b>

**SKILLS & TOOLS**

**Tools & Platforms:** Excel (Advanced: Pivot Tables, VLOOKUP, IF, Data Cleaning, Power Query) | Power BI | Tableau | Microsoft Office Suite | SPSS

**Business Skills:** Data Cleaning | KPI Reporting | Customer Analytics | Finance & Operations Analysis | Business Research

**Programming & Databases:** SQL | Python (Basics for Data Manipulation and Visualization)

**Soft Skills :** Analytical Thinking | Problem-Solving | Time Management | Adaptability | Collaboration & Leadership

**RELEVANT PROJECTS****Netflix Customer Churn Analysis**

Aug 2025

- Built an ETL workflow using Power Query to clean and transform a Kaggle customer dataset for analysis.
- Used SQL queries to extract patterns in customer behavior, focusing on churn trends and high-risk segments.
- Designed a Power BI dashboard to visualize churn rate, demographics, and subscription usage.
- Identified key factors contributing to customer churn using SQL, Excel, and Power BI.

**Consumer Perception Research on Sustainable Airlines**

May 2025

- Collected and organized survey data from 100+ respondents on consumer attitudes toward sustainability.
- Applied statistical techniques in SPSS to identify patterns in perception, preference, willingness to support sustainable airlines and to understand consumer behaviour and sustainability adoption.

**INTERNSHIP EXPERIENCE****Finance Intern, Numaligarh Refinery Limited**

Apr 2025 – Jun 2025

- Tracked and validated vendor invoice data in Excel to ensure compliance with company policies and reduce payment delays.
- Used Excel functions to investigate discrepancies, flag compliance risks, and support internal control checks.
- Performed ratio and trend analysis in Excel to evaluate financial health and highlight potential risk areas.
- Documented findings in structured Excel reports and proposed improvements to strengthen vendor payment workflows.

**COURSES AND CERTIFICATIONS****IBM Data Analyst Professional Certificate***In Progress, Expected 2025***Excel Skills for Business Specialization, Macquarie University***In Progress, Expected 2025***Deloitte Australia Data Analytics Job Simulation**

July 2025

Completed a virtual job simulation focused on data analysis and forensic technology. Classified and structured datasets in Excel, then built an interactive Tableau dashboard to draw business insights.

**PwC Switzerland Power BI Job Simulation**

July 2024

Delivered a client-style analytics engagement with PwC Switzerland, building KPI dashboards in Power BI to investigate HR data, recommend corrective actions to improve workforce decision-making and organizational design.

**VOLUNTEERING AND CO-CURRICULAR ACTIVITIES****Events Volunteer, Centre for Social Action, Christ University**

Oversaw planning and execution of fundraising events, handling logistics, venue setup, and coordination. Supported smooth operations by managing resources and ensuring tasks were completed on time.

**Creatives, Student Welfare Office, Christ University**

Coordinated event logistics and resource allocation to support seamless setup and smooth operations. Contributed to planning and setting up decorations, ensuring timely execution of creative and logistical tasks.
